Brian Skelton

Technical Support & Implementation Specialist | SaaS, SQL & Integrations
BrianSkelton30@gmail.com | Alpharetta, GA | linkedin.com/in/b-skelton

PROFESSIONAL SUMMARY

Technical support and implementation professional with 9 years in SaaS (HCM and payroll): about five years in product support, account management, and digital adoption, followed by about four years in implementation and technical consulting. Troubleshoots configuration, data, and integration issues using SQL, Datadog, and Jira; configures workflows, SSO/SAML, and API and SFTP integrations; and works with product managers and engineers on bugs and enhancements. Led a Pendo rollout that brought 300+ in-app guides to market in its first year and an initiative that cut client interactions by 58% ($1M ROI), and held 98% retention on a $1.3M book. Builds AI tools that reduce manual setup work. M.S. in Computer Science (Georgia Tech, in progress).

CORE SKILLS

Support & Implementation: Technical Troubleshooting & Escalation | Client Onboarding & Go-Live | Technical Specifications | Data Migration & Validation | UAT & Change Enablement | Documentation & Training | Jira
Technical: SQL (PostgreSQL, MySQL, MS SQL) | Pentaho Reporting | API Integrations (REST, SFTP) | SSO & SAML | Workato | Datadog | Postman (introductory) | Python (foundational)
Tools & AI: Salesforce | Pendo.io (Administrator Certified) | Gong | Claude, ChatGPT & Claude Code | AI Agents & Workflow Automation | AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

Implementation Manager & Solutions Architect
Seso Inc. | Remote | Jan 2026 – Oct 2026

Led implementation for payroll and HCM deployments, configured the SaaS application, and worked with product managers, engineers, and the tax compliance team on bug reports and enhancement requests.

- **Implementation Lifecycle:** Managed end-to-end onboarding for payroll and HCM deployments, translating business needs into technical specifications and ensuring a seamless go-live.
- **Internal Tooling & Knowledge Systems:** Built the implementation team's standard project planner and reference documentation, encoding agricultural payroll compliance requirements (941/943 filing, H-2A worker treatment, mid-year YTD loading, GL mapping) into reusable process assets.
- **Data Migration & Integrity:** Oversaw end-to-end migration strategies, ensuring accuracy across high-volume payroll data transfer and validation.
- **Solution Architecture & Integration:** Designed custom data integrations and automated workflows using SQL and relationship-based logic to resolve unique client payroll challenges.
- **AI Vendor Review:** Reviewed a $40-50K AI document-ingestion vendor proposal, defined acceptance criteria, and gave feedback on how it would affect delivery workflows.

Technical Solutions Consultant
PrimePay | Remote | Apr 2023 – Jan 2026

Delivered technical implementations for HR SaaS clients—discovery, solution design, configuration of workflows and integrations, and rollout—while managing timelines, risk, and stakeholder communication.

- **Client Discovery & Bespoke Solutions:** Conducted client interviews, workshops, and surveys to define needs, then designed tailored HR processes and reporting that automated tasks and reduced manual effort.
- **Project Management:** Managed technical project delivery, timelines, and risk; tracked issues in Jira and projects in Salesforce Inspire Planner while troubleshooting payroll, time and attendance, and workplace systems.
- **Custom Workflows & Reporting:** Implemented custom workflows in Sync HR for 10 clients (about 7 per company entity; two clients with 10+ entities) from discovery to production; built nearly 100 bespoke reports for data feeds, validation, and import automation with direct SQL and Pentaho, including an Azure DevOps headcount feed; built Workato workflows.

- **SSO/SAML & Documentation:** Set up SSO/SAML with client IT teams, walked clients through their side, and documented a reusable process; wrote documentation and training.

Digital Engagement Specialist Paylocity | Remote / Lake Mary, FL | Sep 2021 – Apr 2023

Led the implementation and adoption of Pendo, guiding clients through key journey points with in-app guidance and data-driven improvements.

- **Product Adoption:** Led implementation and accelerated adoption of Pendo, working with product owners and directors to map guides, NPS surveys, and analytics; brought 300+ in-app guides to market in the first year.
- **Journey Optimization:** Led the "Top 8" initiative that reduced client interactions at key journey points by 58%, achieving a $1M ROI.
- **Governance & Enablement:** Built the governance model and standard operating procedures for the Digital Adoption team; ran user research to understand client behavior and utilization.

Technical Support Specialist II Paylocity | Remote / Lake Mary, FL | Nov 2019 – Sep 2021

Supported clients and internal teams from implementation through service, turning recurring issues into documented product requirements.

- **Support & Data:** Resolved 350+ tickets a month in Salesforce; used Datadog and SQL to review client data, escalated bugs, analyzed trends, and built knowledge articles and training.

Account Manager III Paylocity | Remote / Lake Mary, FL | Sep 2017 – Nov 2019

Guided cloud HCM clients from setup through expansion while helping refine project management systems.

- **Retention:** Managed a $1.3M book of business with account strategies that achieved 98% retention, troubleshooting issues to prevent escalations.
- **Expansion:** Guided 80+ clients from setup through expansion, pitching additional features based on usage and client size and running the implementation and user testing.

SELECTED PROJECTS

- **Implementation Project Planner (2026):** Designed and built the team's standardized project planner, with phase-level scheduling driven dynamically by project start and go-live dates and an editable weighted phase distribution—adopted as the team template.
- **Client Lifecycle & Project Management Platform (2026):** Built a platform that replaced separate spreadsheets with one view of the client lifecycle from sales handoff through go-live and support, giving the team clear visibility into status, project health, and tasks.
- **AI General Ledger Setup Tool (2026, Seso):** Built an AI tool that converts a customer chart of accounts and sample journal entry into an import-safe chart of accounts, with separate reviewer agents validating the main agent output and non-fitting accounts flagged for customer review.
- **AI Import Automation & Customer Hub (2026, Seso):** Used AI to aggregate customer data into import-ready templates, shared as reusable team skills, and to run payroll data ingestion in-house; built a hub pooling Zoom and Gong calls by client.

EDUCATION

M.S., Computer Science Georgia Institute of Technology | Atlanta, GA
Jan 2025 - 2029 (In Progress)

A.S., Network Engineering Technology – Cloud Infrastructure Security Valencia College | Orlando, FL
2021 | GPA 3.94

B.S., Criminal Justice Columbus State University | Columbus, GA
2013 | GPA 3.73

CERTIFICATIONS

Workato Automation Pro III (2025) · **Pendo Administrator** (2022) · **AWS Certified Cloud Practitioner** (2021)

Computer Programming Specialist – Web Development (Valencia, 2020) · Computer Programming Specialization (Valencia, 2020) · Intro to Programming Using Python (Sololearn, 2025) · Pendo Product-Led Strategies
